

Secure, Scalable, & Reliable High-Speed Network Access, Installed Quickly

Get the speed, performance and reliability of fiber for your communications and network needs - even if your business doesn't have direct fiber access. One Ring Networks' fixed wireless services provide a secure and reliable alternative to the conventional ILEC. In fact, our large coverage area extends into independent territories where the ILEC traditionally dominated. With fixed wireless access, you have an alternate solution to your primary network, or a redundancy solution to complement your existing wire line network - whatever works best for your business. Our fixed wireless network is built out completely independent from the ILEC, freeing up resources and giving your business the diversity it needs.

With speeds ranging from 1.5Mbps to 1000Mbps, our complete Ethernet solution is easily scalable, and can be installed within days, not weeks. Therefore, you can support your business continuity and network ensure that your business will never face downtime with fixed wireless access as back-up network to your fiber network.

Benefits

- Broad range of bandwidth options from 1.5 Mbps to 1 Gbps
- Supports multiple services, including dedicated Internet access, Ethernet, MPLS IP-VPN and private line
- Installation in just days
- Superior reliability with 99.999% uptime
- Provides network diversity and redundancy to ensure maximum uptime for mission-critical communications
- Secure, interference free wireless connectivity over FCC-licensed spectrum

Bridging the Fiber Gap

One Ring Networks provides fixed wireless access solutions to deliver dedicated Internet access, Ethernet, MPLS IP-VPN and private line services. Fixed wireless access helps fill the gap between fiber- and copper-based facilities, with carrier grade reliability and the capacity to accommodate fluctuating network traffic.

Move Data Faster

With fixed wireless access, you can move more data faster as if you are directly connected to a fiber network. This solution can help increase productivity and provide you with:

- Better support for applications that demand higher bandwidth and dedicated bandwidth capable of supporting peak data demands
- Scalable bandwidth options from 1.5 Mbps to 1 Gbps to meet your needs today and tomorrow as your demands grow

Superior Reliability

Fixed wireless access offers all of the performance and reliability of fiber and is backed by carrier-grade Service Level Agreements (SLAs) that in many cases can provide even better uptime than fiber-based network access.

- Carrier-grade SLAs
- Network monitoring of our network 24/7 from its Atlanta-based network operations center
- Top performance, connectivity and throughput from our fully-owned network

100% Uptime

For mission-critical businesses such as schools and healthcare institutions that require network redundancy, fixed wireless access provides true network diversity. Our solution delivers reliable, robust and physically diverse network connectivity.

Highly Secure

Fixed wireless access is delivered over our Tier-1 level licensed wireless spectrum, meaning your wireless signal won't be affected by interference that typically interrupts unlicensed spectrum. Further, One Ring Networks can provide additional security measures to ensure the integrity and security of your company's voice and data communications.

- Encryption devices can be installed at either end of the radio link
- Advanced Encryption Standard (AES) can be applied internally to the radios
- Can support transport of real-time, high definition video streams for surveillance networks and data

Value & Quick Installation

One Ring Networks fixed wireless access helps lower network operating costs by eliminating the need for additional circuits or new Customer Premise Equipment (CPE). Additionally, our solution is easy and quick to install and can scale up or down as your business needs change.

Call 1-855-ONE-RING or email sales@oneringnetworks.com for a fixed wireless quote today.

One Ring Networks is a preferred carrier that powers today's business connections in the Atlanta and Dallas-Fort Worth markets. With innovative managed services and quick installation, One Ring Networks provides small, mid-sized and enterprise organizations with a faster, more reliable Internet connection.
